

概覽

因應紅磡海底隧道附近社區的環境欠佳，區內行人網絡連貫性不足，香港理工大學提議於隧道收費廣場上興建一個「綠化平台」，理大學者更為此進行了一系列跨學科的調查及研究，發現「綠化平台」項目除了可以有效改善鄰近地區的空氣質素外，更可為社區帶來廣泛及長遠裨益，包括增加公共空間，提供通道方便往來毗鄰社區及前往尖東海旁一帶。而其環保及可持續發展的效果，更使項目贏得2014年環保建築大獎的優異獎(研究及規劃類別)。

建議的「綠化平台」佔地4萬3千平方米，可作各類康樂、文化及體育設施用途。為與社會各界攜手制定更完善的發展方案，我們特意舉辦「綠化平台」研討會，並邀請到多位來自規劃、工程、交通、旅遊、綠色建築等業界的資深代表於會上交流，除了探討項目的發展潛力，亦會討論如何進一步落實這項富有創意的社區工程。

現誠意邀請閣下撥冗出席研討會。[研討會流程及嘉賓講者名單可參閱附件](#)。

Overview

Due to the poor environment and fragmented connectivity of neighbourhoods around the Hung Hom Cross Harbour Tunnel, The Hong Kong Polytechnic University (PolyU) has advocated the construction of a "Green Deck" over the toll plaza of the tunnel. Further to a series of multi-disciplinary research and studies conducted by PolyU faculty members, it is considered that the "Green Deck" project is not only effective in improving the air quality, it will also bring extensive and long-term benefits to the community, for instance, increasing open space and providing convenient access to the nearby districts and Tsim Sha Tsui East waterfront. With its environmentally-friendly features and sustainable benefits, the project has been recognized with the Merit Award in Green Building Award 2014 (Research and Planning).

The proposed "Green Deck" area covers 43,000 square metres, which can be used to accommodate a wide variety of recreational, cultural and sports facilities. With a view to engaging the different stakeholders in the formulation of a better development proposal, we are organizing a Conference on "Green Deck", with guest speakers from various industries including planning, engineering, transportation, tourism and green building. Apart from discussing the development potential of the project, we will also explore how best we could take this innovative social project forward.

You are cordially invited to take part in this conference. [Detailed programme and the list of speakers are available in the attachment.](#)
